

Glazing Materials

Available in: Full Sheet 1220 x 915mm
Half Sheet 915 x 610mm

Glazing Type	Characteristics	Price for Full Sheet	Price For Half Sheet	Price per m ² cut to size
Clear Float Glass (21002)	Basic smooth float glass, ideal for low cost glazing.	£10.43	£5.22	(21034) £20.00 /m ²
Non Reflective Glass (25001)	A picture framing glass which is acid etched to give a non glare, diffused finish. Not suitable for deep box framing or multi layered mounts over 3mm.	£19.00	£10.43	(25006) £35.00 /m ²
Clear Acrylic (44010)	This clear, 'Plastic Glass' is ideal for glazing pictures. It is light weight, and durable, can be cut with a craft knife or Fletcher Score mate. Supplied with protective, peel off film.	£10.21	£5.57	(44012) £20.00 /m ²
Non Reflective Acrylic (44011)	This Non Reflective 'Plastic Glass' is ideal for glazing pictures. It is light weight, and durable, can be cut with a craft knife or Fletcher Score mate. Supplied with protective, peel off film.	£10.96	£5.57	(44013) £22.00 /m ²
Low Reflection Invisible (22002)	Low Reflection Invisible framing glass is chemically etched to scatter light as it strikes the glass. This subtle treatment allows a clear view of the framed work without distortion - for a sharp clear image.	£60.00	n/a	(22015) £109.00/m ²
UV plain (2.5mm) (23004)	UV plain is an ideal choice for framing original art, limited prints and other valued works of art. It has UV filtration to protect the pigments and fibres of the framed work. Additionally the glass is more neutral in tone. A full technical description is available on request.	£37.61	n/a	(23008) £75.00/m ²
UV Non Reflective (2.5mm) (23006)	UV Non Reflective has the same characteristics as Conservation Clear but with the addition of an anti reflective treatment to reduce glare. A full technical description is available on request.	£73.60	n/a	(23009) £100.00/m ²
UV Low Reflection Invisible (2.5mm) (24 009)	For the most precious artwork or family heirlooms, UV Low Reflection Invisible glass is the highest quality anti-reflective picture framing glass available in the industry. Tru Vue's proprietary manufacturing process, called magnetron sputtering, is adhered to an Extra Clear lower iron substrate to produce an ultra protective nearly invisible glass. It protects against harmful light rays and has the highest light transmission along with the lowest reflection rating of any glass product. The result is consistent, durable quality and the most attractive display for artwork.	£197.00	n/a	(24013) £250.00/m ²
