FREE Seminars / Demonstrations

Places are limited and do need to be reserved in advance. To be sure of your place contact info@diyframing.com to book your seats.

Quality Framing, Clear Presentation

10.30 am – 11.30 am

A single project, illustrating how to create a frame, presenting artwork appearing to float above the mount board background, housed in what a "presentation box".

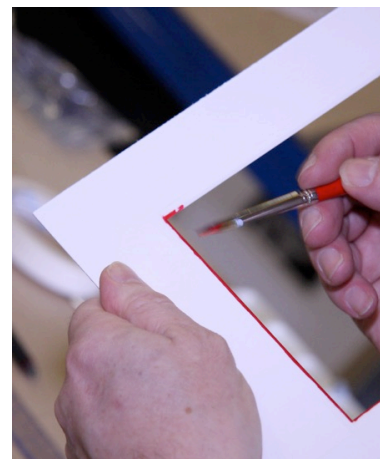

- How to use the Nobex saw and frame measure system: *if you've just bought one but never seen how to use it*
- Using a mitre trimmer to give even crisper joints;
- Using a studio joiner;
- Cutting glass;
- Using Econospace spacers to give depth from glass without a mount;
- Attaching artwork to a foam block so it appears to hover above the mount.

Close to the Edge:

12.30 pm – 1.30 pm

An attempted pun to links some useful ideas for demonstrations. The idea is to simply to focus on the visible edges of items in a frame:

- Adding inside edge of the frame (fillets / slips);
- Colour bevel edge on a mount;
- Deep bevel mounts;
- Mount slips; and
- A very easy way to float-mount artwork so you can see the edge of the print / art paper.

5 reasons to come and see us:

- 1) pick up some bargains
- 2) do some Christmas shopping
- 3) see kit demonstrated
- 4) see the new moulding range
- 5) join our FREE seminars
