

HOW TO ORDER

Buying moulding is simple & very cost effective - the more you buy the cheaper it gets!

Chop Service

This allows you to purchase the exact amount you require ready mitred to complete a frame all you have to do is join it.

Per Length

Buying by the length lets you choose how much you need to complete a framing job with very little waste. Available in 1m, and 1.4 m lengths. Longer lengths than 1.4m can be purchased from the trade counter.

Per Pack

For customers who require either pack quantities or wholesaler's discount of up to 40%, DIYframing now offers a large range of mouldings that are available at trade rates.

To order chop service just fill in either the **EXACT SIZE** or **GLASS SIZE** width and height for your chosen moulding type.

EXACT SIZE are the dimensions (length by height) of the external edges of the frame

GLASS SIZE dimensions are those of the board / total artwork package being fitted into the frame. They include the mount where one is being used.

NB when creating chopped sections for glass size we add 2mm to the dimensions in order to create an easy fit. The maximum size for chop services is 140cm (Exact size) or 120cm (Glass size) unless you arrange personal pickup. Chop services through the shop needs to be ordered 24 hours in advance of collection.

To order "Per Length Moulding" either visit the website at www.diyframing.com or phone

To order pack quantities do the following

1. Decide on the type of moulding you require from our range online.
2. Make a note of the reference numbers & work out how much moulding you require.
3. Call us **FREE** on **0800 801061** with details of your order.
4. We will take your order, process it and dispatch it to arrive with you in 48 hours (if order received before 12noon)
5. Your payment by credit card will be taken 7 days later.

To be eligible for this service and receive up to 40% discount on the mouldings you order.
