FREE Seminars / Demonstrations

Places are limited and do need to be reserved in advance. To be sure of your place contact info@diyframing.com to book your seats.

Getting Back to Basics: Measurements, materials, proportions and balance

10.30 am – 11.30 am

Using a selection of images and cutting mounts, we look at the different ways to measure and record the dimensions for all the materials you'll use in a frame. Taking into account:

- How to establish the aperture, whether the artwork includes a printed border, includes a signature or limited edition detail or needs to be float mounted
- How to determine the glass size. What aspects might impact your choice of the mount border size and the "rules" for the perfect border width, whether the border is the same on all sides, bottom weighted or if there are other factors in the mix.
- How to establish just how much wood you need to make the frame.

Wash Lines: Adding Decorative Detail to Mounts

12.30 pm – 1.30 pm

This is an introduction to adding decorative detail to your mounts using lines and washes. Not many framers offer this technique, often used in the past for water colours. It can be useful to know in case a customer needs you to replace an existing mount that has faded or become damaged, or as a fun alternative to a double mount or v-groove. The focus in this session is on:

- Introducing ruled lines and washes
- Looking at the equipment and medium required for ruling lines
- Planning wash lines and proportions

5 reasons to come and see us:

- 1) Pick up some bargains
- 2) Discover new products
- 3) See kit demonstrated
- 4) See exciting new release of mouldings for in-store chop service orders
- 5) Join our FREE seminars
